

The veto was disposed of in the Senate yesterday, with comparatively little fuss about it, the vote standing 34 to 30 against passing the finance bill over the veto. Now the House follows suit and all hands go to work to produce a common sense, sound finance bill and take a step toward specie payment.

The Legislature is just on the eve of adjournment and the lobby is like the dolphin, liveliest at the hour of its death approaches. The virtue of members is severely tried for the few days previous to the break-up, and they should have the prayers of all truly good men. Bills that must go through on account of the jobs they include will be abundantly greeted with the popular oil of gladness; and there are points beyond which temptation is almost irresistible. Especially is this true with members who don't look for a re-election. We see that the anti-railroad-pass bill was defeated while the supply bill lingers in a ragged condition of doubt and debate. Stand firm to honor, gentlemen.

Don't Swear No.
The meanest, most useless and most contemptible vice that ever grew rank in the hot-house of the devil is profane swearing. We protest against it not as preachers and church members object to sin on professional grounds, but as members of society, as decent men. One cannot get away from it, hardly. On the job, in cars, in places of business, on the open street, at the dinner table, and everywhere else rises the incessant oath and the habitual swearer. Young men just learning to curse appear to think there is something manly and brave about it; while old swearers interlard the commonest remarks they make with cold-blooded blasphemies and a variety of diabolical curses. No man or woman of any refinement and decency at all can be otherwise than shocked and shocked by these brutal and vulgar verbal misdeeds every day; and no fellow who is shamefully guilty of projecting them can do otherwise than sink beneath the contempt of such men and women with every vile epithet they hear him utter. Public profanity ought to be an indictable offense, with a penalty of ten days in jail for every oath.

Pay Forgetful.
The Sanborn case, like an old-fashioned Alexandrian hexameter, still drags its slow length along. Personally, we shall feel as though a special thanksgiving day would be a proper thing if the truth about the case were ferreted out and lead to legislation and improved opinion preventive of the recurrence of its double in any coming future. Pay has been examined and garrulously testified to nothing at all. Pay is a New York lawyer who, on going abroad for three months "to educate his children" almost unconsciously accepted a commission from Sanborn to look after a little matter of two in the direction of revenue frauds supposed to be committed through the connivance of one consular agent in various places there. How he supposed to get authority to act as a pro tem representative of the Treasury, Pay did not know and nobody was able to tell him. Pay, unlike the mischievous hero of Rodman Drake's poem, was not willing to admit himself to be a "cultured prig"; he conceived to have collected many "examples" of alleged non-duty-paying exportations to this country, mostly in the line of kid gloves, but the obviousness of what he had done with them or whether the Treasury was a penny richer by the operation. Pay stayed off starvation while in Europe at the rate of fifty dollars a day; just the price of an Oregon mule. He traveled like the Shah of Persia in more than first-class vehicular accommodations and paid therefore four times first-class prices, all out of his allowance from Sanborn; and disposed himself generally in a way calculated to impress the public with the veritable Gaiety of the sort. Pay's importance and the rigorous justice of the action whose plenary he seemed to be. In the course of a few months (the education of his offspring having been duly perfected) he came home and presented his little bill, which even Sanborn deemed exorbitant, *à la carte* lack of any is by no means an office-acknowledgment of the fact that he had done his duty; on the contrary he was forced into the position of a special agent, and against his will; and, as we said, is a "forgetful" man of the names of the patriots to whom he owes his unsought promotion. He guesses it may have been Butler who nominated him, but he "was seen" by Sanborn only. For one piece of information freely given by him to his suffering country, any mistakes of Pay's should be as freely forgiven; that is his wonderful photograph of Sanborn, who, Pay says, "is a peculiar man and does peculiar things." As to the minor details of his mission, Pay can't remember anything about them. Forgetful Pay!

What Dr. Winchell Thinks About It.
At last a sensible book has been published on the be-fuddled subject of Darwinism, and we gladly welcome it. Dr. Winchell, the most competent man of our acquaintance in America to discuss its bearings thoughtfully, scientifically and without prejudice, rises to simple justice to the actual facts of the English savant. Regretting that we have not space for an adequate statement of the Doctor's clear and unanswerable exposition of a doctrine of evolution, we must content ourselves with making merely a half-dozen general allusions to it. First, he rescues Darwin from the absurd charge of teaching constructive infidelity; showing that, properly interpreted, evolution complements the skill of a Divine Worker. He emphatically states that it assumes of necessity the existence and the attributes claimed for Him in the Bible. Dr. Winchell further explained (what any sensible reader of Darwin ought to know for himself) that Evolution as expounded and illustrated by all the writers who have so far touched the subject at length, predicated an intelligent creature will behind all the manifestations of nature in growth and change. And surely it could not be required to teach an honest Deist that the being and providence of a personal God is a never-permitted by the admission of any form of evolution save such as expressly denies its plainest intelligence. This is no way in the plainest intelligence, Darwin is as no guilty of than the Moslem deologue. Orthodox theologians in plenty find in the present attitude and evidence of evolution only higher and more invincible proofs of them than have ever been given by the spiritual notion of an infinite number of special creations. The fools which make up the class of orders, will keep on braying about what they don't understand as much as the alphabet of, precisely as they have always done; but when ignorant indignation has had time to cool and needless fears for the foundations of faith have settled to rest, we think the Christian world, will at least think that the courageous Englishman, who at least thinks that the picky a Methodist as the Chancellor of the University of Syracuse, and so accomplished a reasoner, has used his trenchant pen to so good a purpose.

De Mortis—Summer.
The major part of the sessions of both houses of Congress on Monday was devoted to the delivery of formal eulogies on Mr. Sumner's life and character. Each speaker avowed to desire at the very least to do justice to the departed Senator, while several were deeply moved at heart by the revival of many reminiscences of warm personal friendship invariably called up on the occasion. Nothing could more powerfully illustrate the depth and firmness of the hold which Mr. Sumner's modes of thought and speech, his clear convictions and great courage and purity had and still have upon his associates, than the strength and uniformity of the many borne by those to these controlling and decisive qualities. It is, perhaps, to be regretted that Mr. Sumner was compelled by his engagement in Boston to be absent from the Senate on the day of the commemorative session. While Mr. Sumner had many closely-attached friends, he and the Senator from Missouri were drawn together by affinities of character and purpose which did not exist in anything like the same degree in the case of his more kindly and sympathetic contemporaries. Both were possessed of ripe scholarship and of cultivated tastes in the fine arts; both worshipped the same lofty ideal of government and regarded with identical contempt the shifts and subterfuges which ordinary politicians hold to be inseparable from the management of practical affairs. Both were interested in the study of international law and were like competent to perceive and appreciate the excellencies of systems quite foreign to ours. In other words, Messrs. Sumner and Schurz had cosmopolitan sympathies and did not think it necessary to extract inferential laudation for a republic out of the abuse which it is always possible for a demagogue to cast upon a monarchy. These and other ties which need not be specified now bound the two men in a sort of Damon and Pythias alliance; and, therefore, we say again, the absence of Mr. Sumner from among the speakers on Monday afternoon was of more kindly felt. Still, full justice, not lacking the element of generosity in respect to points where no man has lived so as not to require it, was meted out to the departed memory of the philanthropist and statesman of his country and century. Among all the rest the remarks of Congressman Lamar (Dem.) of Mississippi were worthy of especial mention; not for the sake of eloquence pure and simple nor for any profound or original sentences, but for the fact that he came from the mouth of a man who was an ardent secessionist in 1861 and who is yet a representative of the sentiment of the best and most intelligent of the late rebel population. Time rarely brings stranger and yet more entirely natural revenges than this, the South forgetting the old-time hate and putting by the old-time misrepresentation, flinging her words of odorous roses upon the new. The words of the man she once detested and maligned. It is here clearly shown that no feeling is permanent but good-will and no passion immortal but love; and that out of the ashes of the fearful fire of our civil war will grow and are growing the filices of peace and the oaks of a better friendship. Now, let us finally hope that the strong, true, pure spirit which informed the Senate and House when they said such kind and loving words about the man and deeds of their great peer will remain to shape legislation and to save the country for whose good he gave himself up as a sacrifice upon the altar of a perpetual faith.

AN EXTRAORDINARY CASE.
The case of Shaw vs. Babcock for balance due for services in lobbying, before Justice Daly was to-day given the jury. In his charge Justice Daly said: "Mr. Shaw says he did not employ Senators Matton, Williams and Crane as Senators, their term being expired, but that he employed them—those dignified gentlemen and public officers—for their influence with Tweed and Connolly in effecting the payment of this claim. Without making any observations on facts of this case, it is a very extraordinary state of things presented by this evidence that for the purpose of getting a claim alleged to be a valid one \$18,000 would have to be paid for that service, and that strikes the minds of ordinary persons as very extraordinary."

REPORTS.
Mr.

The veto was disposed of in the Senate yesterday, with comparative little fuss about it, the vote standing 34 for to 30 against passing the finance bill over the veto. Now at the House follow all and hands go to work to produce a common sense, sound finance bill and take a step toward specie payment.

The Legislature is just on the eve of adjournment and the lobby is like the dolphin, liveliest at the hour of its death approaches. The virtue of members is severely tried for the few days previous to the break-up, and they should have the prayers of all truly good men. Bills that must go through on account of the big jobs they include will be abundantly grieved with the popular oil of gladness; and there are points beyond which temptation is almost irresistible. Especially is this true with members who don't look for a re-election. We see that the anti-railroad-pass-bill was defeated while the supply bill lingers in a ragged condition of doubt and debate. Stand firm to honor, gentlemen.

Don't Swear No.

The meanness, most useless and most contemptible vice that ever grew rank in the hot-house of the devil is profane swearing. We protest against it not as preachers and church members object to sin on professional grounds, but as members of society, as decent men. One cannot get away from it, hardly. On the open street, at concert doors and everywhere else rises the incessant oath of the habitual swearer. Young men just learning to curse appear to think there is something manly and brave about it; while old swearers interlard the commonest remarks they make with blooded blasphemy and a vocabulary of diabolical curses. No man or woman of any refinement and decency at all can be otherwise than lacerated and shocked by these brutal and vulgar verbal missiles every day; and no fellow who is shamefully guilty of protecting them can do otherwise than sink beneath the contempt of such men and women with every vile epithet they hear him utter. Public profanity ought to be an indictable offense, with a penalty of ten days in jail for every oath.

Fay Forgetful.

The Sanborn case, like an old-fashioned Alexandrian hexameter, still drags its slow length along. Rumor, now almost as true as a proper thing if the truth should at last be ferreted out and lead to legislation and improved opinion preventive of the recurrence of its double in any coming future. Fay has been examined and garrulously testified to nothing at all. Fay is a New York lawyer who, on going abroad for three months, "to educate his children" almost unconsciously accepted a commission from Sanborn to look after a little matter or two in the direction of revenue frauds supposed to be committed through the connivance of our consular agents in various places there. How he happened to get authority to act as a procurator representative of the Treasury, Fay did not know and nobody was able to tell him. Fay, unlike the mischievous hero of Rodman Drake's poem, was not willing to admit himself to be a "culprit" but he conceded he had collected many "samples" of alleged non-duty-paying exports to this country, mostly in the line of kid gloves, but was oblivious of what he had done with them or whether the Treasury was a penny richer by the operation. Fay stayed off starvation while in Europe at the rate of fifty dollars a day; just the price of an Oregon mule. He traveled like the Shah of Persia in those days, mostly in the line of accommodations and paid therefore four times first-class fares, all out of his allowance from Sanborn; and disposed himself generally in a way calculated to impress the world with the versatility of Fay with a sense of his own importance and the rigorous justice of the nation whose plume he bore.

remembrance of warm personal friendship invariably called up on the occasion. Nothing could more powerfully illustrate the depth and firmness of the hold which Mr. Sumner's modes of thought and speech, his clear convictions and great courage and purity had and still have upon his associates, than the strength and uniformity of the testimony borne by them to these controlling and desirable qualities. It is, perhaps, to be regretted that Mr. Sumner was compelled by his engagement in Boston to be absent from the Senate on the day of the commemorative session. While Mr. Sumner had many closely-attached friends, he had the Senator from Missouri were drawn together by affiliations of character and purpose which did not exist in anything like the same degree in the case of himself and any other contemporary. Both were possessed of ripe scholarship and of cultivated tastes in the fine arts; both worshiped the same lofty ideal of government and regarded with identical contempt the selfish and unscrupulous politicians held to be inseparable from the management of practical affairs. Both were interested in the study of international law and were alike competent to perceive and appreciate the excellencies of systems quite foreign to ours. In other words, Messrs. Sumner and Schurz had cosmopolitan sympathies, and did not think it necessary to extract inferential laurels for a republic out of the abuse which it is always possible for a demagogue to cast upon a monarchy. These and other ties which need no specified name bound the two men in a sort of Damon and Pythias alliance; and therefore, we say again, the absence of Mr. Schurz from among the speakers on Monday afternoon was more keenly felt. Still, full justice, not lacking the element of generosity in respect to points where no man has lived so as not to require it, was done to the departed member of the philanthropic and statesman of his country and century. Among all the rest the remarks of Congressman Lamar (Dem.) of Mississippi were worthy of especial mention; not for the sake of eloquence pure and simple nor for any profound or original estimate of Mr. Sumner's character, but from the fact that they came from the mouth of a man who was an ultra secessionist in 1861 and who is yet a representative of the sentiment of the best and most intelligent of the late rebel population. Time rarely brings stranger and yet more entirely natural revenges than this, the South forgetting the old-time misrepresentation, flouting her wreath of odorous roses upon the new-made grave of the man she once detested and maligned. It is here clearly shown that no feeling is permanent but good-will and no passion immortal but love; and that out of the ashes of the fiercest fire of olden wars may grow the fairest flowers of peace and the oaks of a better friendship. Now, let us finally hope that the strong, true, pure spirit which informed the Senate and House when they said such kind and loving words about the life and deeds of their great peer will remain to shape legislation and to save the country for whose good he gave himself up as a sacrifice upon the altar of a perpetual faith.

WALTZ, THE MURDERER.

Search for the Murdered Organ Grinder—Conflicting Circumstances—He has Probably Murdered Three Men.
Hudson, N. Y., April 23.—Waltz, the Catskill murderer, was taken to the farm very quietly this morning by the Sheriff and his posse, and posted out the spot where he alleges his first victim, an organ grinder, was buried four feet under ground. The place is covered with water and is being drained preparatory to digging in order to verify his story. An organ wheel crank, oil can, and a full suit of clothing, as well as the sponge, with which he says he wiped up the blood, were found in the places he designated. Digging for the body will be commenced as soon as the water is drained off. There seems now but little doubt that Waltz killed two men previous to the secession grinder.

METROPOLITAN NEWS.

The Emigrant Commissioners.
NEW YORK, April 23.—The Commissioners of Emigration to-day replied upon a number of removals, thereby saving an annual expense of about \$30,000 in salaries. Among the persons removed are E. D. Webster, General Superintendent, Lorenzo Cantor, Deputy Superintendent and about twenty minor officials.

AN EXTRAORDINARY CASE.

The case of Shaw vs. Babcock for justice due for services in lobbying, before Justice Daly, was to-day given the jury. In his charge Justice Daly said: "Mr. Shaw says he did not employ Senators Mattoon, Williams and Creamer as Senators, their term being expired, but that he employed them—those dignified exponents of public opinion—who struck out of the report of the Livestock memorial services all allusions to Stanley and the Herald."

UNITED STATES CONGRESS.

SENATE.
WASHINGTON, April 23.

The question being on Wright's motion to lay aside the Louisiana bill and proceed to the consideration of the Finance bill and the President's message, Conkling asked unanimous consent to have the subject made a special order for Friday and that a vote be taken then without debate.

The motion gave rise to debate, which incidentally involved the treatment of Senator Sumner by the administration for his position on the San Domingo question and his displacement from the chairmanship of the Foreign Relations Committee. The debate was participated in by nearly every prominent Senator present, but was finally ruled out of order.

Mr. MERRIMON objected to Conkling's motion and the debate was then confined to the subject under consideration.

A vote was finally reached and Wright's motion adopted—yeas 35, nays 27.

The CHAIR announced that the finance bill was before the Senate and the question was, should it pass, notwithstanding the President's objections? Upon this question the Constitution required that the vote should be taken by yeas and nays. No one taking the floor the bill was called and the vote reached—yeas 34, nays 30. Two-thirds not being the affirmative the bill was lost.

Mr. MAJOR, Mr. MASON, Mr. SCHURZ were paired.

After a short executive session the Senate adjourned.

HOUSE.

Mr. WOOD of New York offered the following resolution, which was referred to the Committee on Ways and Means:

Resolved, That the Committee on Ways and Means be and they are directed to inquire into the expediency of providing for the United States government officials of the city of New York have absent themselves or not absenting themselves from their official duties to influence and control by corrupt or improper means state legislation at the capital of that state, and also whether for these objects they have offered to members of the Legislature as inducements places of profit connected with their office in New York to be given after the adjournment of the Legislature.

The House then took up the legislative appropriation bill and Garfield, Chairman of the committee, addressed the House and the question was, should it pass, notwithstanding the President's objections? Upon this question the Constitution required that the vote should be taken by yeas and nays. No one taking the floor the bill was called and the vote reached—yeas 34, nays 30. Two-thirds not being the affirmative the bill was lost.

Mr. MAJOR, Mr. MASON, Mr. SCHURZ were paired.

After a short executive session the Senate adjourned.

Also, adverse, to abolish the office of Registrar of the University, and to provide for discharging their duties. Agreed to.

The bill in relation to Metropolitan Drawing Room Car Company was reported back, amended and ordered to a third reading.

The bill to legalize the action of a town meeting at Andes, Delaware county, was read a third time and passed.

THANKS TO PRESIDENT GRANT.

Mr. C. S. SPENCER called up the resolution thanking President Grant for his veto of the inflation bill, and moved its adoption.

The previous question was ordered, and the resolution adopted without a dissenting voice.

BILLS PASSED.

Extending time for construction of New York and Albany Railroad.

Amending act relating to making sidewalks and planting shade trees other than in incorporated villages.

EVERYING SESSION.

The House reassembled at 7 p. m.

The report of a majority of the Conference Committee on the bill relative to the Industrial Exhibition Company was received, stating that the Senate receded from its amendment concerning the capital stock required to be paid. Mr. Fish dissented and had his dissenting opinion entered in the journal and the bill goes to the Governor.

The Senate bill amending the New York charter concerning the appointment of heads of departments was reported.

BILLS PASSED.

To incorporate the Alumni Association of Columbia College.

To authorize the construction of a railroad through the streets of Poughkeepsie.

On motion of Mr. BARROW the bill amending the act relating to the inspection of steam boilers was taken from the table.

On motion of Mr. ALVORD the bill was amended so as to exempt persons after paying the expenses of one from paying similar expenses again.

Providing for the repaving of Fifth avenue, New York, with patent pavement. Passed—65 yeas.

Adjourned.

SONS OF TEMPERANCE.

Meeting of the Grand Division.
SYRACUSE, April 23.—The Grand Division of Sons of Temperance of Western New York met in quarterly session here to-day, Grand Worthy Patriarch Rev. E. F. Crane presiding. There was a full attendance and the reports of officers showed the order to be in a flourishing condition, over forty divisions having been instituted during the past quarter. The Grand Worthy Patriarch in his report dwelt at length on the political duty of Sons of Temperance and emphasized the general hostility of temperance men to the reorganization of Governor Dix. His remarks on this subject were received with applause and endorsed by a unanimous vote. A large public meeting was held this evening, which was addressed by the Grand Worthy Patriarch and by Rev. C. H. Meno of Buffalo. The business session will be resumed at nine o'clock to-morrow morning.

THE WEATHER.

To-day's Probabilities.
For the Middle States fresh and brisk north to west wind and clearing weather over the western portion during the morning and over the eastern portion during the evening.

COMMERCIAL REPORTS.

NEW YORK MARKET.

LOCAL INTELLIGENCE.

BUSINESS NOTICE.

We are happy to announce to our patrons that we have secured the well-known Premium Job Printer, Mr. A. V. HAIGHT, late of Ellenville, who will hereafter have entire charge of the Job Printing Department of the Freeman establishment. Mr. Haight's skill and taste are too well known to need any recommendation from us. We are now prepared to do the finest kinds of Job Printing at reasonable rates.

To-Night.—Public Temperance meeting at the Roundout M. L. Lecture Room at 8 o'clock. Pandemonium at Washington Hall.

CITY NOTES.

—That gas-man is moandering around.

—Don't stop your horses on the cross-walks.

—The chicken-pox has prostrated a family or two on the Keyboat.

—You had better plant your peas and beans and cabbages and radishes between the snow storms.

—On Tuesday 16 canal boats laden with 2,000 tons of coal reached the water through the Delaware & Hudson Canal.

—Isn't this lingering in the lap of spring business plaid and rain? Can't spring start a pin or something into lazy old winter?

—Several Roundouts went to Poughkeepsie Monday night to attend the oratorio of Elijah.

—Harry Hector, a Higginsville boatman, has fallen half to half a million. But alas! it isn't our Higginsville.

—Hiram Roosa has purchased of John Gill one of his houses and lots on Chestnut street. We are not at liberty to name the price.

—Surprise parties are in order, but these April snow storms are probably the biggest surprise parties of the season to the sprouting grass and flowers.

—A Temperance meeting will be held to-night at 8 o'clock at the Roundout M. L. Lecture Room, under the auspices of the Ladies Society.

—City Surveyor Hasbrouck has been surveying Stuyvesant street, to establish the grade preparatory to its opening some time in the future, near we hope, but remote we fear.

—One stone near the post-office in Garden street has been so depressed for about half a year or longer as to make a big puddle every storm. It would take about an hour to fix it.

—Here's a chance for our goat exterminators. Newburgh is importing goats, and Roundout could spare her a couple hundred without a pang.

—Staples & Willis' bakery is run night and day to supply orders, and gas is being introduced. We are glad to hear of the large demand there for their really fine cakes and crackers.

—The screw steamer Eady, one of three owned by Louis Luckenbach, formerly of this city, and used for towing about New York harbor, is out on Morgan Everson's sectional docks undergoing repairs.

—The Boston Tea Company will be in this city at Washington Hall on May 4th and remain six nights, to give a variety show and sell the best tea ever sent from China to this country.

—The "softness" of the weather on Tuesday was only surpassed by the cheerfulness of a friend of ours, who can be jolly under circumstances which would cause Mark Tapley to weep.

—A new house is soon to be erected on Fair street by the side of John T. Merritt's saloon near Music Hall. We hope it will be one of those chicken coops that are being built now-a-days on the finest building sites.

—Mr. Dimmick, of the firm of Dimmick, Burhans & Webster, has a fine mocking-bird in his store. It makes very pleasant music for the clerks, and cheers but not inebriates them in their labors.

—People must not complain if dirt is not removed as promptly as they wish. The Street Superintendent is doing all he can with the limited force at his command. Special provision should, however, be made in April, when so much ash is required.

—When one of our composers made Mayor advertise for a Blacksmith Hubber instead of Helper he was suffering from an acute attack of humor (think), and phoned his helper and "hubby," the latter of which he wants so much to be.

—Bob Tammany bought the Opera House and, one of them, after crossing the railroad track at the intersection of Mill street and Hasbrouck avenue, being inspired by a locomotive whistle tried to make Bob stand on his head—but paw! Bob fooled that quadruped by making it balance on its tail, and we reckon if Robert catches the engineer of the bellows which "scar" that "hoos" he'll balance him! Oh, My!

—The noted mill pond suit, between the City and F. W. Gross, had a hearing before Referee R. E. Andrews at Lawton & Stebbins' office on Tuesday. This suit has been pending for some time, and has been sent back from the Court of Appeals for a new trial. It will now probably take a summer trip and winter tour around the same entrancing legal drive, in which the Coats mountains are the principal feature of the landscape. Some of our most prominent men are witnesses.

Murder at Parkville.

An Italian laborer shot and killed another laborer at Parkville, Sullivan county, on Sunday night, April 14. There does not seem to have been any provocation for the crime. The murderer escaped. He is described as about 35 years old, black hair, black hair and side whiskers. The officers in the adjoining towns have been notified, and a general search is being made for the prisoner.

Tows.

The following were yesterday's tows:

Steamers Marshall and Valentine—Barge Manchester, schooner Newport, boats Hoffman, L. Day, light, Annie Maria, Alice to New York.

Steamer Pittman—Boats Beach, Maggie, Samson to New-Hamilton, 1,869 tons to Poughkeepsie.

Steamer Baltic—Boats C. B. Hill, Samoset, 1,990, Ann, Two Brothers to Albany, schooner R. Hawkins to Athens, ice barge David Terry, P. Dater to Catskill.

Somewhat Muddled.

A city gentleman heard a band of strolling minstrels playing Mollie Darling a night or two ago near Music Hall, and after inclining towards the harper a critical ear, he said: "You That's Scotch, by—?" He poised his ear again, and as the sweet strains rattled over the tympanum said, "No 'tain't, 'tis German;—so it is!" Then he stood dumb; but as the ravishing strains swept out on the night air, and then returning eddied through Hermann's saloon, where some chaps were stowing away a dozen choice bivalves, he corrected himself with enthusiasm by saying, "By—G—(He), it is Scotch, ain't it?" Then he turned and was playing, with his harp over his shoulder, and left in disgust.

An Appeal That Should be Heeded.

CARRIAGES AND SADDLERY HARDWARE,
Corner of Wall and North Front streets.

KINGSTON, N. Y., April 20, 1874.

HORATIO POWELL, Esq., Editor Daily Freeman:—I have observed that you are always on the side of the People and the Taxpayers. Now, the City of Kingston is bonded for two hundred thousand dollars for the building of the Wallkill Valley Railway. It is not clearly the duty of the People and Taxpayers of this city to travel by their freight ship Wallkill Valley Railway. We have offered every inducement in fares and freights, and compelled all competitors to reduce their rates. Surely the road has benefited our citizens. We would be pleased to have your views on the subject in your daily paper.

Truly Yours, **ARTHUR SAHLER,**
Vice President V. V. R. Ry. Co.

Vice President Sahlers' note touches a chord in the Freeman's heart that responds with pleased alacrity to an appeal founded in reason and common sense. Before considering it we cannot forbear expressing our gratification at the evidence we have in the latter letter-head that Mr. Sahlers' firm is still living, albeit its disappearance from the advertising columns of The Freeman may have caused fears of an untimely demise.

In sending his request to The Freeman the Vice President of the Wallkill Valley Railway has not appeared in vain. The Freeman is a firm believer in the duty of encouraging home institutions. It believes that the community that practices it will prosper vastly more than the one that conspicuously and continually neglects it. The duty is reciprocal, but even when the obligation of reciprocity is not accepted by one party, there is still a duty resting upon each business man to patronize others in the same place. The Freeman recognizes this duty and acts upon it to the fullest extent, its editors, reporters, collector, composition, pressmen, cashiers, carriers, and even its devil, buying everything they use in the city of Kingston if possible. As there are no other establishments of the kind expected to give to one locality, our force keeps half a dozen boarding-houses running; its carriers are urged to the speediest possible gait in order that our home shoemakers may have a profit; our reporters go in rich apparel, mix in the roughest fights to get items, and come out with corns that the home tailor may have a job; the engagements entered by its hands to the pioneer molasses-eater, merchant has been so enthusiastic that he is now the steady support of one mother and two children, besides keeping his younger brother in marble and his sisters in chewing-gum, while a couple of young dentists have found such gold mines in Freeman molar that it takes four lively stables and half a dozen young ladies to keep up with them. Even the pomatum that sheds its rich fragrance from the portulacal beds and bestows its unctuous mark upon her flowing locks on Sunday evenings, is bought at Knapp's, while the compositorial handkerchiefs scented at Masten's are it starts out on its career of conquest from Shawangunk to Pine Hill; and nary a tramp shows his experienced visage at our office but the way to the City Arms House is pointed out to him with a smile and dispatch. With regard to such little items as these The Freeman is careful to patronize home institutions, in larger matters we are munificent and magnanimous. For instance, here is the Delaware & Hudson Canal Co., a concern that for years has been struggling to get on its feet. It never got along well until with wise discrimination The Freeman so dispensed its patronage that its dividends rose as high as the average mile level. By the happy device of buying more in a week than they spent money with us in a year, their treasury was at once replenished, and one of their officers got so rich he was even elected Alderman. It didn't matter to The Freeman that it could buy its coal in Canajoharie, freight it here and save half a dollar a ton; not a bit of it, home institutions did not get on their feet until they were.

And so with our freight lines. The Freeman helps them from honest poverty into affluence by paying promptly for its tons of freight that other printers may not have to wait their dues for printing the blanks on which our bills are made out. By the extensive patronage of The Freeman the Gas Company has been enabled to lift its head above water both in its piping and in its business. We have two extended the help of hand to the banks, and have shown most generous disposition to borrow their money, always permitting them to take their seven per cent. and add it to their modest surplus, and whenever we have observed a little notary struggling upwards, protesting against poverty, we have patronized him with liberality.

The interests of society and business in every community are so interlinked that the prosperity of one man or concern can hardly be accomplished without all being benefited, and to patronize local firms, companies or railroads is one of the plainest dictates of common sense. The Wallkill Valley Railway, like the R. & O. R. R., is worth its cost to the country through every dollar of its cost. It is worth it, bringing the market to localities beyond out of reach, and affords an easy transit to thousands previously dependent on the slower wagon or stage, the saving in time and cost of travel alone being to many more than their taxes. Each town and our city, as a municipality, has a financial interest in the welfare of the road. In addition to this, as stated in the Vice President's letter, this road has reduced the cost of freight to a minimum, and by its competing lines. Patronage is due to the concern that initiates such a benefit, and it should be bestowed liberally. There has also been a commendable spirit of enterprise in the Wallkill Valley management in providing for the wants of the traveling public and business men generally. This should be recognized, and it entitles the road to a still more liberal consideration. The Vice President's letter is a masterpiece of logic and reason. The Wallkill Valley Railway, like the R. & O. R. R., is worth its cost to the country through every dollar of its cost. It is worth it, bringing the market to localities beyond out of reach, and affords an easy transit to thousands previously dependent on the slower wagon or stage, the saving in time and cost of travel alone being to many more than their taxes. Each town and our city, as a municipality, has a financial interest in the welfare of the road. In addition to this, as stated in the Vice President's letter, this road has reduced the cost of freight to a minimum, and by its competing lines. Patronage is due to the concern that initiates such a benefit, and it should be bestowed liberally. There has also been a commendable spirit of enterprise in the Wallkill Valley management in providing for the wants of the traveling public and business men generally. This should be recognized, and it entitles the road to a still more liberal consideration. The Vice President's letter is a masterpiece of logic and reason. The interests of society and business in every community are so interlinked that the prosperity of one man or concern can hardly be accomplished without all being benefited, and to patronize local firms, companies or railroads is one of the plainest dictates of common sense. A Little Fun.

Now at McEntos & Dillon's foundry, undergoing repairs to its boiler, is the smallest steamer intended for river navigation. It is about fourteen feet in length, draws about four inches of water, is propelled by a two-blade screw, driven by a two thousand five hundred mosquito power engine. The boiler, which can be dismantled, works on a chain on a watch chain, is an upright tubular one. The crew consists of one person, a lad of perhaps sixteen years, named Aspinwall, who resides at Barrytown, and during the storm on Saturday last this youthful Viking got his diminutive ship under steam and voyaged to this port from the snug harbor of his home to have the craft's boiler repaired. The work could not be done until the Admiral Aspinwall returned home, leaving his flagship moored at the foundry dock, but to prevent accident in the absence of her crew two men hauled her out and tenderly carried her into one of the repair shops, where she can be viewed by all who desire. We should remark that the crew of this craft, when about to depart on a short voyage, coals up by sprinkling a little salt in one eye, but if he intends being absent some days and in fearful of losing weight, he takes a little salt in both eyes. The doctor, who takes along a soap box filled with black diamonds. But oh, the whistle of this little craft!—'twould cause a baby elephant to die of mirth!

Personal.

Past Grand John W. Seale of this city, instituted April 10, 1874, I. O. O. F., of Poughkeepsie on Monday evening.

J. K. Merritt, the enterprising dry goods man of Saugerties, was in town yesterday, as active and earnest as ever.

R. H. Andrews, of Hudson, was in town Tuesday as Referee in the Mill Pond suit. He is a very dignified looking gentleman, with flowing gray locks, and stately walk. He is one of Columbia's best lawyers.

We received a very pleasant call yesterday from one of the very best men Kingston ever had out—Mr. James O. Merritt. Everybody will be glad to know he is in good health.

The New License Rates.

It will be seen by the advertisement of the Excise Commissioners that the license fee has been raised twenty dollars. This was done in order to meet the increased cost of a large number of the small establishments, and thus lessen the traffic in the spirituous beverage. Now is the time for the temperance men to band together for the work. One of the commissioners told our reporter if a good cause was shown why any man should not have a license, no license would be granted, and he would be glad to know he is in good health.

Resolutions of Condolence.

At a regular meeting of Zephania Lodge, No. 131, I. O. B. T., held at their rooms April 19th, the following preamble and resolutions were unanimously adopted:

Resolved, That in the dispensation of an all-wise and merciful Providence our highly esteemed and beloved associate, Jacob Sampson, has been called from us in the spring of life and usefulness; therefore, we, the members of this lodge, do hereby express our sincere sympathy and condolence in their great affliction; and we pray that our Heavenly Father may vouchsafe to them consolation in their great trial.

Resolved, That a copy of these resolutions be forwarded to our relatives, transmitting to the family and be published in The Roundout Daily Freeman.

Good and Bad Luck.

Hon. George M. Beebe of Sullivan seems to be in luck. Charlie Spencer gave him a magnificent edition of Shakespeare, and now Hon. James H. Sullivan has presented him with a splendid diamond pin.—Freeman.

The Mary Powell.

On Tuesday morning the Mary Powell was towed from her wharf to the shears on McEntos & Dillon's foundry dock, where the steamers' smokestacks were being cut off. The vessel was being lengthened and having the jets in her removed. Captain Anderson and his chief engineer, Mr. Lawrence, find that the jets in the pipe cause a draft from the surface of the fires only, involving a more rapid consumption of fuel and requiring coal of larger size than the ordinary blowers, and for those reasons the jets are removed and the old blowers replaced.

VINEGAR BITTERS
Dr. J. Walker's California Vinegar Bitters are a purely vegetable preparation, made chiefly from the native herbs found on the lower ranges of the Sierra Nevada mountains of California, the medicinal properties of which are extracted therefrom without the use of Alcohol. The question is almost daily asked, "What is the cause of the unparalleled success of VINEGAR BITTERS?" Our answer is, that they remove the cause of disease, and the patient recovers his health. They are the great blood purifier and a life-giving principle, a perfect Renovator and Invigorator of the system. Never before in the history of the world has a medicine been compounded, possessing the remarkable qualities of Vinegar Bitters in healing the sick of every disease man is heir to. They are a gentle Purgative, well as a Tonic, relieving Congestion, Inflammation of the Liver and Visceral Organs in Bilious Diseases.

The properties of Dr. Walker's VINEGAR BITTERS are Aperient, Diaphoretic, Carminative, Nutritious, Laxative, Bile, Sedative, Counter-Irritant, Sudorific, Alterative, and Anti-Bilious.

Grateful Thousands proclaim VINEGAR BITTERS the most wonderful Invigorant that ever sustained the sinking system.

No person can take these Bitters according to directions, and remain long unwell, provided their bones are not destroyed by mineral poison or other means, and vital organs wasted beyond repair.

Bilious, Remittent and Intermittent Fevers, which are so prevalent in the valleys of our great rivers throughout the United States, especially those of the Mississippi, Ohio, Missouri, Illinois, Tennessee, Cumberland, Arkansas, Red, Colorado, Brazos, Rio Grande, Pearl, Alabama, Mobile, Savannah, Roanoke, James, and many others, with their vast trigrates, throughout our entire country during the Summer and Autumn, and remarkably so during seasons of unusual heat and dryness, are invariably accompanied by extensive derangements of the stomach and liver, and other abdominal viscera. In their treatment, a purgative, exerting a powerful influence upon these various organs, is essentially necessary. There is no cathartic for the purpose equal to Dr. J. Walker's VINEGAR BITTERS, as they will speedily remove the dark-colored viscid matter which clogs the bowels are loaded, at the same time stimulating the secretions of the liver, and generally restoring the healthy functions of the digestive organs.

Fortify the body against disease by purifying all its fluids with VINEGAR BITTERS. No epidemic can take hold of a system thus fore-armed.

Dyspepsia or Indigestion, Headache, Pain in the Shoulders, Coughs, Tightness of the Chest, Dizziness, Sour Eructations of the Stomach, Bad Taste in the Mouth, Bilious Attacks, Palpitation of the Heart, Inflammation of the Lungs, Pain in the region of the Kidneys, and a hundred other painful symptoms, are the offspring of Dyspepsia. One bottle will prove a better guarantee of its merits than a lengthy advertisement.

Scrofula, or King's Evil, White Swellings, Ulcers, Erysipelas, Swelled Neck, Gout, Rheumatism, Indolent Inflammations, Mercurial Affections, Old Sores, Eruptions of the Skin, Scald Head, Sore Eyes, Eruptions, Itch, Scurs, Discolorations of the Skin, Humors and Diseases of the Skin of whatever nature, are literally driven up and carried out of the system in a short time by the use of these Bitters.

For Female Complaints, in young or old, married or single, at the dawn of womanhood, or the term of life, these Tonic Bitters display so decided an influence that improvement is soon perceived. Cleanse the Vitiated Blood whenever you find its impurities bursting through the skin in Pimples, Eruptions, or Sores; cleanse it when it obstructs and squalors in the veins; cleanse it when it is foul; your feelings will tell you when. Keep the blood pure, and the health of the system will follow.
